

Scott Township Addressing

PROJECT INFORMATION

In order to enhance the response time of the emergency service personnel, Scott Township has gone to an E911 addressing system. As result all Rural Route (RR), Rural Delivery (RD), Highway Contract route (HC) addresses are being replaced with new street addresses.

It is also necessary to re-address the buildings that already had street addresses based on the National Emergency Numbering Association as well as rename some of the existing roads. The new addresses will make it easier for emergency service personnel to find you in an emergency.

If you receive mail at this location, the United States Postal Service will use the new address listed above for mail delivery.

Your cooperation is essential to accurate 911 services. Emergency service personnel depend on accurate address information to respond as quickly as possible in an emergency.
